Subject: Corrective Action Next Steps (CAF202)

Date: 1/23/17

I spoke with Doug Arnold representing the Former Electrolux Facility on 1/23/17. Doug told me that Electrolux was wanting to move forward with MNA and ICs for the subject facility. I told Doug that EPA was concerned that (1) existing soil contamination would further contribute to the groundwater contamination, (2) that the groundwater contamination was in the 15 year capture zone of the in-town muni water supply wells, and (3) that such groundwater contamination might still migrate to the muni water supply wells given enough time. I told Doug that EPA would like Electrolux to consider removing and disposing of the building foundation and floor slab and contaminated soil. Doug stated that they would discuss such things and get back to me by 2/28/17.
